

# HIDDEN IN PLAIN SIGHT

Presentation for teachers/parents

We are witnessing continued advancements in technology alongside increased accessibility to substances such as alcohol, nicotine, vaping products, Delta-8 THC, and marijuana—factors that are increasingly impacting the youth in our communities. This presentation offers valuable guidance on how to navigate difficult conversations with students and children, while also providing critical education on recognizing and responding to emerging trends within your community.

## What you will learn:

- ✓ Drug Trends: Gain insight into the substances currently present in our communities, consumption methods, and risks associated with their use.
- ✓ What to Look Out For: Increase awareness by monitoring local advertising, accessibility of substances, and other environmental factors that may influence youth behavior.
- ✓ Resources for Support: Gain practical steps and tools to apply the knowledge you've gained.
